

IT'S CALLED THE TOTAL SURGE PROTECTION PLAN...BROUGHT TO YOU BY TOLEDO EDISON.

YOUR HOME IS A HOTBED FOR SURGES

Every day your electronics and appliances are vulnerable to electrical surges—inside and out—that can shorten their lifespan or cause long-term damage. Turning on any motor-driven or electronic device can start an electrical surge that affects other equipment in your home. Your appliances and electronics are especially vulnerable if your home has outdated circuits and interior wiring.

Electrical surges generated from the outside, sometimes caused by lightning strikes or neighborhood problems, can also cause electrical spikes to enter your home. Many times, these surges enter your home through the phone line and head straight toward your valuable electronics.

THE SOLUTION? GET THE TOTAL PACKAGE.

The Total Surge Protection Plan—exclusively from Toledo Edison—takes the mystery and confusion out of buying everyday surge suppression products.

This package includes a selection of plug-in surge suppressors and a meter-based surge suppressor—all specially selected by Toledo Edison—which work in tandem to effectively block or minimize electrical surges.

TERMS AND CONDITIONS

1. We have the right to enter your property to install, operate, maintain and/or remove our surge suppressor equipment at your meter.
2. The meter-based surge suppressor remains our property, and only our employees or representatives may install, operate, or remove it.
3. If any of the surge suppression products fail while you are covered by the Safety Surge Protection Plan and a power surge damages your electronic equipment or appliances, which should be protected by the product, LEA International, the manufacturer, will:
 - a. As necessary, repair or replace (at its option) the suppressor within a reasonable time after you notify us of the failure and
 - b. Pay for repair or replacement (at its option) of your standard electrical or electronic equipment and appliances that were damaged because of the system failure, up to the fair market value of the equipment/appliance, which shall in no event exceed the total amount of \$5,000 per appliance, \$2 million per home for appliance damage. It reserves the right to approve any replacement you choose.
4. The Safety Surge Protection Plan warranty covers standard electrical and electronic equipment.

Standard electrical equipment is covered by the warranty that accompanies the Meter-Based Surge Suppressor, and is defined as any indoor appliance with primarily electrically operated mechanical components, such as refrigerators, clothes washers, central vacuum systems, conventional ovens, clothes dryers, heating/air conditioning units, power tools, coffee machines and other small appliances, and direct-wired spas, microwave ovens and garage door openers.

In addition to the Meter-Based Surge Suppressor, electronic equipment must also be properly connected to Plug-in Surge Suppressors in order to be covered by their warranty, and are defined as any appliance with extensive electronic circuitry and components, such as solid-state televisions, VCRs, modems, CD players/stereo systems, answering machines, security systems, cable TV tuners, personal computers, microwave ovens, electronic game systems, fax machines and word processors. All equipment must be operated in accordance with manufacturers specifications. Use of the Plug-in Surge Suppressors with adapters or extension cords voids the warranty.

5. You must notify LEA International, through us, of damage to appliances due to suppressor failure within 30 days of the failure in order to be eligible for the repair or replacement benefit. Return any failed plug-in suppressor to us and it will be forwarded to LEA International for repair or replacement.
6. The warranty does not include medical or life support equipment.
7. If the Safety Surge Protection Plan service is terminated by either party and the suppressor is left at your meter, there is no liability related to the suppressor after termination.
8. Except for the LEA International warranty for the Safety Surge Protection Program which provides for the repair or replacement benefit of the fair market value of the equipment/appliance, which shall in no event exceed \$5,000 per appliance and \$2 million per home for appliance damage because of a suppressor failure, we disclaim all liability and make no warranties of any kind to you.
9. The LEA International warranty begins on the date of installation of your Meter-Based Surge Protector and plug-in suppressors. The warranty remains in effect as long as your lease payments are current. Lease payments more than 60 days in arrears will terminate coverage.

LEA International is totally responsible for the component product and equipment warranties.

PROTECTION

from electrical surges
now comes in one
complete package.

*For computers,
televisions, modems,
stereos, refrigerators
and more.*

Toledo Edison
A FirstEnergy Company

Two-month Lease
FREE

A TOTAL PACKAGE YOU CAN'T FIND IN ANY STORE.

Your first line of defense against surges comes at the electrical outlet and the phone line. This is where plug-in suppressors offered through Toledo Edison prove particularly effective for in-line protection. You can purchase two-outlet or four-outlet models with either coaxial cable TV or phone/modem jacks when you lease the meter-based suppressor (below).

TWO OUTLET MODEL FOR \$49*

FOUR-OUTLET MODEL FOR \$69*

Guaranteed Free Replacement if an electrical surge damages these units.

To complete total protection, your package includes a meter-based surge suppressor, which you lease from Toledo Edison for an affordable monthly fee. **This device is not available at any store.**

WITHOUT TOTAL SURGE PROTECTION

- Your appliances and electronics are virtually unprotected from electrical surges. The surges flow freely through the wires of your home.

\$6.95 PER MONTH LEASE
plus sales tax placed on your electric bill
No charge for installation**

This device is installed directly between your electric meter and the entry point of your home's electric service. It serves to absorb any surge before it enters your home and damages any electronic or motor-driven appliance.

A Toledo Edison representative will install the meter-based suppressor at no charge. You do not have to be home at time of installation, but make sure that sensitive household equipment is turned off.

Introductory offer:
**NO LEASE CHARGES
FOR FIRST TWO MONTHS**

\$2 MILLION WARRANTY

When you sign up for the Total Surge Protection Plan, you're covered by a \$5,000 per product/\$2 million per home warranty for damage, by LEA International.

1 - 8 0 0 - 5 0 5 - S A V E

*To ensure total protection, you are required to lease the meter base before you buy the plug-ins. **12-month lease required

WITH TOTAL SURGE PROTECTION

- Using a meter-based surge suppressor and plug-in suppressors, electrical surges are reduced to levels that major appliances and electronics can handle.
